ME; I don't know how we got this under the communication about Mossville, but this needs to be under Devil's Swamp title so we can keep track.

Bart won't be going for quite awhile, because the report won't be final till we have the crawfish. I can mention it on the phone, but we agreed not to announce it to them that way. They have probably heard about it already so I guess it doesn't make much difference now, but I need to bring it up so at least they know this is a result of their inquiry about a scholarship

YOU; When will Bart be going?

I think it would be good to mention the scholarship as part of a bigger meeting as an FYI. The main purpose/focus of the meeting should be an update on the site.... with a *sidebar* "by the way" mention of: "We'd like for you (the community of Alsen) to know that Clean Harbors has established a scholarship fund with BRCC for students of Alsen. Then let them know who to contact etc to find more information about the scholarship (or pass out the info). We'd need to make sure it is in their system, on their website, and that we have the correct contact person for this particular scholarship.

EPA shouldn't take any credit for this scholarship. If I send you to Devil's Swamp just to tell the TAG about the scholarship, that would put too much focus on just that. You can mention it to Rosemary and Rev. Claiborne as part of a phone call really... with all the same parameters. .

ME; No, Bart doesn't want to go until the results are back on the study and he has something to tell them. I don't want to get myself in a tight spot but want to at least meet with Rosemary and Rev. Claiborne so they can make an announcement about the Scholarship to the Community in their next meeting. I want to avoid putting myself in front of the whole Community, where I wouldn't be able to answer all their questions.

YOU; Will Bart be going with you?

Plan on going!

ME; I need to announce the Scholarship

YOU; If you go and meet with the TAG.....what is are you planning on doing/saying?

ME; Devil's Swamp-----I really need to go meet with Rosemary and the TAG. The results of the study have been delayed because we have not been able to catch crawfish. Clean Harbors has placed new traps and will be replacing and checking

9600793

them on a continual basis until we can catch them. The prime season is March and April but we hope to catch some before that.
